

## PowerSync® 5.0 Workstation PC Backup and File Synchronization

### Overview

PowerSync® 5.0 WS provides automatic file synchronization and backup for Windows 98, Me, NT/2000 Professional and XP. It can be setup to automatically update or back-up files from portable or desktop to server PCs across LANs, WANS, VPNs and RAS. Among its features:

- Automatic directory and file synchronization and replication
- Rich choice of scheduling and filter options
- Works over LAN, WAN, VPN & RAS
- Central control for system administrators

### Data Backup & Synchronization

PowerSync 5.0 WS is ideally suited for Laptop or Desktop PC users working in any sized organization who need to ensure that vital corporate or personal directories and files are synchronized and backed up to servers or NAS filers. It is also ideal for system administrators who want to preinstall a client utility on all deployed Windows PCs which performs scheduled, background, disk to disk differential backups of critical corporate data.

- When used to support a comprehensive high data availability plan, PowerSync 5.0 WS can also ensure that local or remote servers contain the same up to date data as user's Laptop or Desktop PCs.
- When used to support a comprehensive data backup plan, PowerSync 5.0 WS can ensure that only changed files or directories are backed-up from Laptop or Desktop PCs to local or remote servers.
